PROFILE

Certified software test analyst skilled at testing APIs, test automations, writing test scripts and test cases. Driven to ensure high-quality delivery of tasks through a personal philosophy of continuous learning and being teachable as well as the ability to communicate clearly and concisely.

PROFESSIONAL EXPERIENCE

Test Automation Engineer, Seamfix Jun 2021 – present | Lagos, Nigeria

- Automated high priority projects with **Selenium** reduced the regression time by 65% through converting 90% of manual testcases to automated scripts.
- Created framework for **cypress**, which was used across the company to automate new projects.
- Wrote **test scripts** to test new implementations and hotfixes.
- Participated in product and design sessions with developers, UI designers and product managers to start **early testing** and improve quality at early stages.

Intern, Quales Consulting 📁 Jan 2021 – Jun 2021 | Lagos, Nigeria

- Created HTTP request methods and wrote test scripts to test **APIs** in Postman.
- Wrote well defined **test cases** that accelerated the productivity in the TDLC.
- Reported bugs on **Jira** boards using Trello.
- Automated tests to reduce time taken to perform regression testing using **Selenium** (Java).
- Analyzed raw data sheets using tools such as Vlookup, match, index, etc.

IT Support, Nigerian Petroleum Development Company 📁 Jan 2020 – Jun 2020 | Edo, Nigeria

- Inspected new systems to test the necessary drivers and software and approve that they are up to standard before distributing to users.
- Directly responsible for managing the Managing Director's boardroom, overseeing all IT services needed.

EDUCATION

Bachelor of Science (BSc) in Computer Science, Babcock University Sep 2017 – Jun 2021 | Ogun, Nigeria

- Conducted classes to explain difficult concepts in some courses to several classmates.
- Supervised group projects and participated in teamwork tasks.
- Achieved excellent grades in programming languages like Python and Java.

SKILLS

Programming (Java/Javascript) | API testing | Selenium | Cypress | Git | GitHub | Jira | Trello | Katalon | MySQL | PostgreSQL | Apache JMeter | Microsoft Excel

PROJECTS

World Population,

Jun 2021

Java, Selenium, TestNG, Maven, PostgreSQL [!\[\]\(99f58673407353e96a019fbca558fd72_img.jpg\)](#)

- Developed an automated script with **Selenium** (Java) that gets the counting total population of the world from a website every second for a specific time.
- Utilized the **TestNG** annotations to managed the test methods.
- Integrated **PostgreSQL** which was used to store the data with **Maven** to manage all dependencies.
